

XM radio is a great source of information and discussion surrounding the issues our country faces. Congress should not stifle this medium but promote it and see it as an opportunity to reach a wider audience with their views and name. Don't be constantly lowering the bar but encourage all communications industries to raise the value of their products. XM Radio is a critical vendor in the marketplace of ideas and communications content. Enact laws that promote industry growth. Not laws that restrict it in favor of narrow special interests.
